WORD ON THE STREET

Coronado® SD: Severe Duty is All in a Day's Work

Freightliner's flagship vocational truck, the Coronado SD, is engineered to take on severe environments and extreme conditions. Customizable to meet your specific operational or business needs, it's tough on the outside, comfortable on the inside, and ready for a hard day's work—no matter how severe.

Tough on the outside

Built to provide the muscle you need for the biggest loads:

- Front axles rated from 12,000-22,000 lbs.; rear axles with capacities of 23,000-70,000 lbs.
- TuffTrac® rear axle suspension provides maximum traction in high articulation environments

Various power options deliver maximum fuel economy:

- Choice of Detroit Diesel's DD13™, DD15™, DD16™ or Cummins ISX15
- All engines use SCR to lower emissions and deliver up to 5% better fuel economy

Comfortable on the inside

The wide, spacious cab—your office on wheels:

- Extra-roomy doors and windows that roll almost flush with the door
- Noise abatement materials throughout the cab cut road noise
- Optional, fully equipped sleeper with multiple cabinets and power outlets

It's all in the details

Solid engineering to withstand a constant barrage of punishment:

- Range of frame and wheelbase configurations—customize to your needs
- Electronics and wiring designed to last the truck's lifetime
- Rear cab mounts use air springs spaced for stable, wide stance while giving a good feel for the road
- Lightweight aluminum cab meets or exceeds rigorous crashworthiness testing
- Single piece, durable fiberglass hood tilts almost 90 degrees for easy access
- Three-step intake system with single filter lets your engine breathe by combating airborne dust on the dirtiest jobsites

Visit our Sales Department for more information on how the Coronado SD can help you improve the bottom line.
